### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on 25 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,4,8 and 12 rejected under 35 U.S.C. 102(b) as being anticipated by Downes et al. (U.S. patent # 5,589,669).

Downes et al. disclose the claimed invention a terminal pin (figure 5 and 8), an elongated pin or rigid terminal pin (figure 8, item 54), a flange (figure 8, item 58), a shoulder (figure 8, item 64), a circuit substrate, a printed circuit board (figure 8, item 62), and a chamfered (figure 8, item 66).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2838

4. Claims 2-3,5-7,9-11 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Downes et al. (U.S. patent # 5,589,669) in combination with Roberts et al. (U.S. Patent # 6,335,548 B1).

Downes et al. disclose the claimed invention as explained in the claims 1,4,8 and 12, above, except the utilization of the technique for terminal pin with two opposed chamfered, wave soldering, reflow soldering. Roberts et al. teaches the utilization of similar technique for terminal pin with two opposed chamfered, wave soldering, reflow soldering (column 12, line 25-45, column 9, line 60-65, column 2, line 45-68). It would have been obvious one having an ordinary skill in the art at the time invention was made to modify Downes et al.'s terminal pin by utilizing the technique taught by Roberts et al. for the purpose providing fast manufacturing process for printed circuit board.
